Homework Assignment #0
Due: 09/01/2004 in class

Please provide the following information about yourself:

Name: _______________________________________________

Year of study (junior or senior)? __________________________

Courses taken that are (or seem) relevant to Bioinformatics (what and when):
  Informatics or computer science related courses:

  Biology or chemistry related courses:

Other experience relevant to this course:

Programming languages you are comfortable using:

Does any final exam for any of the courses you are taking this semester interfere with the final exam for this course? If yes, what course?

Are you familiar, unfamiliar, or very familiar with:
  Windows : 
  Unix/Linux : 
  The Web : 
  C and/or C++ : 
  Matlab : 
  Perl : 

Reasons for taking this course:
Do you have an account with the School of Informatics?

What is your preferred email address? This address will be used for communication or important announcements. It will be assumed that you are checking this address approximately once a day.

What is your expectation from the I400 Introduction to Bioinformatics?

Do you have any preference in terms of career you are seeking? (e.g. industrial, academic, undecided, might go to grad school etc.). Please provide a long answer if possible.

Please acknowledge that you understand that all homework assignments, projects, presentations, and exams are individual unless collaboration is explicitly allowed.

Please acknowledge that you understand the late assignment policy given in the course syllabus.

Miscellaneous: (please use this space if there is anything you’d want me to know but I haven’t asked)
